

IN THE SPECIFICATION

Please amend the specification as follows:

Replace the paragraph spanning pages 3-4 between page 30, line 4, and page 4, line 6 of the specification with the following:

Figure 1 shows an apparatus 2 for receiving a digital information signal comprising a first and second video signal. The first video signal is the main video and the second video signal is the additional video content. The apparatus comprises a receiving unit 4 for receiving said digital information signal. The receiving unit could comprise a reading unit not shown, for reading the information signal from a record carrier, ~~e.g., a computer-readable medium~~ such as an optical disc 6. However, the receiving unit could also be connected to a reading unit or a set-top box 8, which is capable of retrieving both the main video and the additional video content and to provide this information in said digital information signal to the apparatus 2. The digital information signal is preferable in the form of an MPEG transport stream. The main video

is in full screen size and the additional content is in reduced size, the size of the PIP-window.
